CORPEX

Corpex Email Archiving

Corpex offers a comprehensive managed solution to your email archiving, email security and email continuity needs. Our software as a service (SaaS) managed email platform delivers to the most exacting and sophisticated corporate requirements.

Our systems archive a copy of every inbound, outbound and if required internal email ensuring regulatory compliance.

Implementation can take less than 24hr and is cost effective with no hardware, software or capital expense required.

e-Discovery tools

Users and administrators have access to email archive search facilities.

You can retrieve and release copies of emails or documents simply, easily and instantly.

Emails can be searched by sender or recipient, date and time, domain, keyword or attachment type and using any necessary combinations.

Email Continuity

Should there be an issue with your mail server we can quickly enable access to our web-based Email Continuity system where your staff can logon to their email account securely from any Internet browser.

When using the Email Continuity interface users are able to send and receive emails, have access to all their email accounts, archived emails and use all the normal email functions. This enables you to carry on business as usual.
